D.A.V Public School, Chitra

Home assignment of summer vacation

Class-X Sub-chemistry FM-20

1) Why does the colour of copper sulphate solution change when an iron nail is dipped in it?

2) Identify the substance oxidized and reducing in the following reaction

(I) 4Na +O₂ =2Na₂O

(ii) Cuo+H₂ =Cu+H₂O

3) What is balanced chemical equation? Why should chemical equations be balanced?

4) Why is respiration considered an exothermic reaction? Explain.

5) Why are decomposition reaction called opposite of combination reaction? Write equation also.

6) What is the difference between displacement and double displacement reaction? Write equation.

7) What do you mean by precipitation reaction? Explain by giving example.

8) Explain oxidation and reduction in term of gain or loss of oxygen with two examples each.

9) Why do we apply paint on iron articles?

10) A shiny brown coloured element 'X' on heating in air becomes black in clour. Name the element 'X' and the black coloured compound formed.

Project: (any one) with explanation

1) To demonstrate electrolysis of water.

2) To show thermal decomposition reaction of ferrous sulphate.
